Post-Surgical Instructions

After declaw surgery, please try to prevent your cat jumping from high areas which could possibly injure his/her feet.

If your cat is not placing any weight on one or both feet, and/or the paws are swollen or bleeding, please call our office.

Your cat used compressed newspaper litter while recovering in our hospital;
You can use your current litter type when your cat returns home.

Please check your pet's incision daily and contact us if you notice any changes to the incision area or your pet's behaviour.

Your pet has been given pain medication which should be effective until the day after release from hospital. Please consult us or the emergency clinic before giving any further medication.

Please contact us at (905)331-1500 if you have any questions or concerns.
